Product Image Roll Module

For Magento 2

User Guideline

Elevate the visual aesthetics of your Magento 2 store with the Webficial Product Image Roll extension. This module introduces an engaging feature that seamlessly displays gallery images upon hovering over a product, enhancing the overall shopping experience. Compatible with list pages, search results, and all product widgets, this extension also seamlessly integrates with configurable product swatches.

Key Features:

Gallery Image Roll on Hover:

Seamless display of gallery images upon hovering over a product, providing an engaging visual preview.

List Page and Search Page Compatibility:

Compatible with list pages and search results, ensuring a consistent and dynamic browsing experience.

Product Widget Integration:

Extends functionality to all product widgets, enhancing product visibility and interaction.

Configurable Product Swatch Integration:

Seamless integration with configurable product swatches, allowing customers to preview variations effortlessly.

Enable/Disable Module:

User-friendly toggle to enable or disable the Product Image Roll feature based on store requirements.

Slider Activation Delay Configuration:

Customizable activation delay for the slider upon mouse hover, tailoring the user experience.

Slider Image Speed Adjustment:

Fine-tune the speed of the slider image transitions, providing control over the dynamic display.

User-Friendly Configuration:

Easy-to-use configuration options, allowing adaptation to various store requirements and marketing strategies.

Immersive Visual Experience:

Provides an immersive visual experience, capturing customer attention and enhancing the overall shopping journey.

Efficient Decision-Making:

Simplifies the decision-making process by offering a comprehensive preview of product variations directly from category and search pages.

Flexible Adaptation to Marketing Strategies:

Adaptable to different marketing strategies, enabling the module to align with seasonal campaigns or specific product showcases.

Seamless Installation and Compatibility:

Designed for seamless integration with Magento 2 stores, ensuring a quick and efficient installation process.

Module Configurations:

Go to Webficial > Catalog Hover Configuration > Configuration from main menu.

The General Configuration section encompasses essential options to fine-tune the functionality of the module. Ensure optimal performance and a tailored experience with the following configuration settings:

Configuration:

Enable/Disable Module:

Effortlessly enable or disable the Product Image Roll feature based on your store's requirements. This flexibility allows you to adapt the module to different marketing strategies, seasonal campaigns, or specific product showcases.

Slider Activation Delay:

Tailor the user experience by customizing the activation delay for the slider upon a mouse hover. Define the precise moment when the gallery images gracefully roll into view, creating an interactive and user-friendly display. The default value is 1 second.
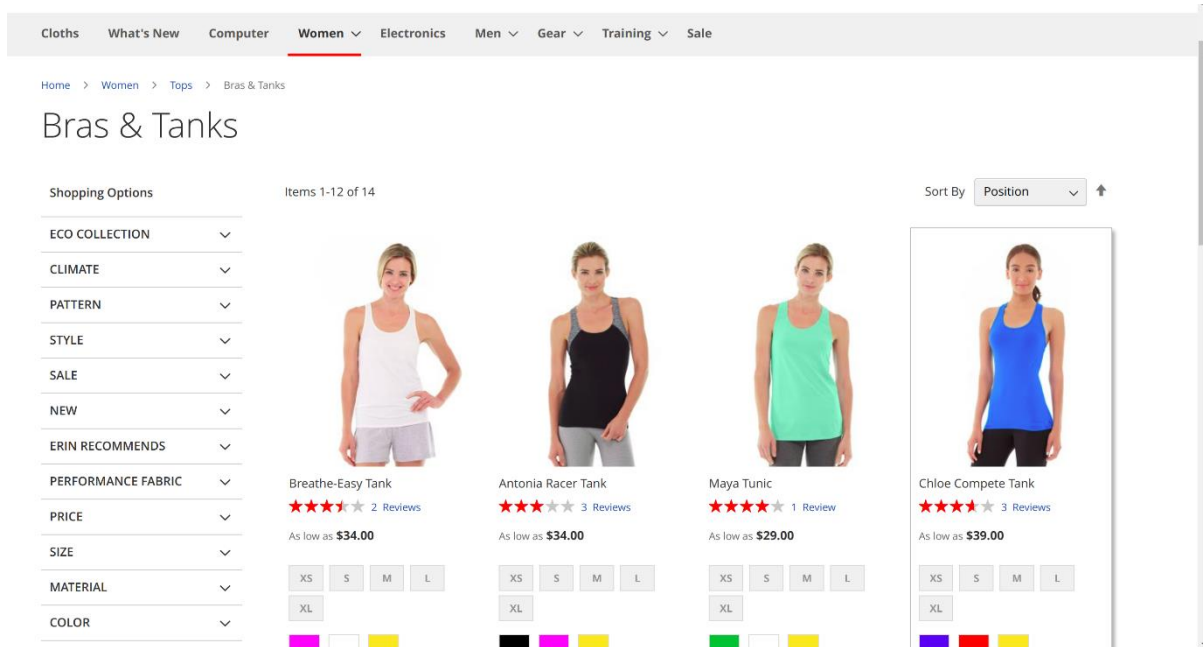

Slider Image Speed:

Fine-tune the speed at which the slider transitions between images. The default setting updates the slider image every 0.5 seconds, ensuring a dynamic yet controlled display. However, you have the freedom to adjust this time interval to match the desired pace of image transitions, aligning with your store's aesthetics.
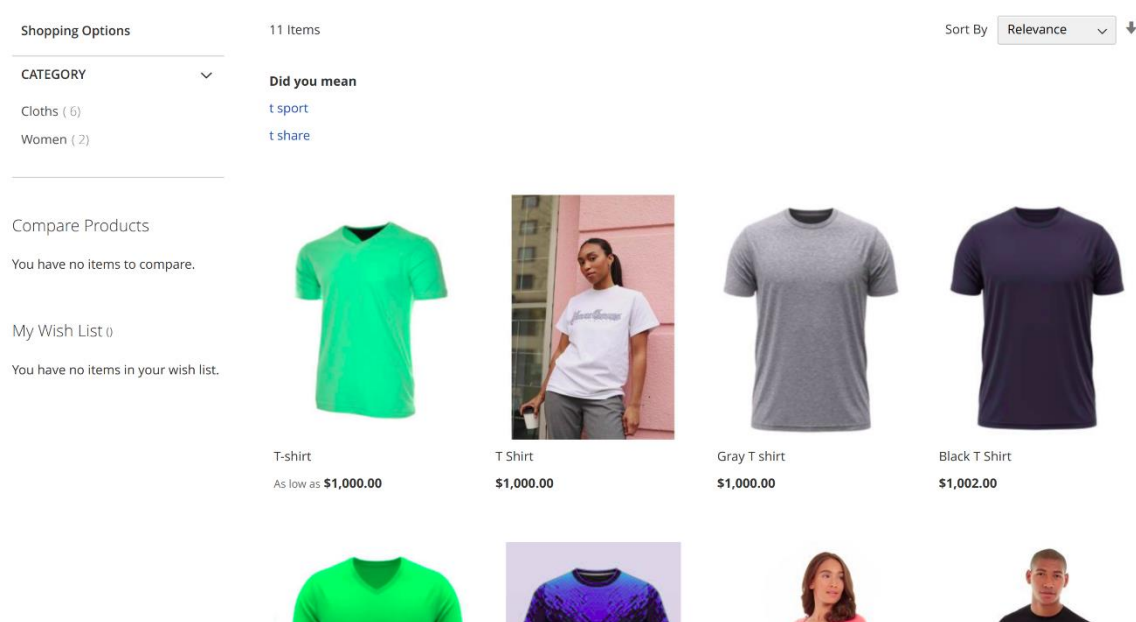

Frontend:

Customers can see a image roll when they hover on any product on category pages or search results page.
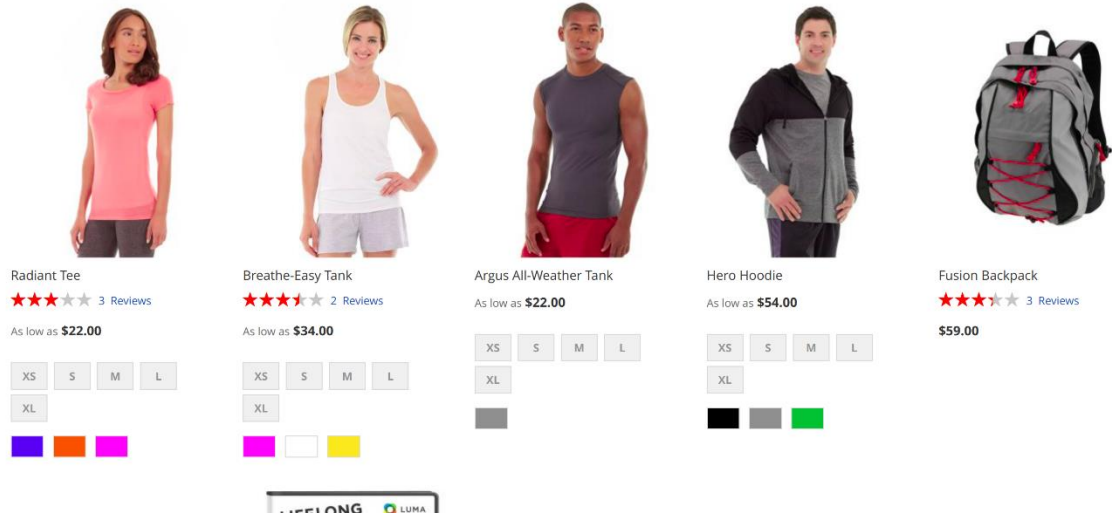

Category Page:

On category pages, when a user hovers on a product image, it will trigger Product Image roll module which will fetch products gallery images and display in a slider.

The module also supports Magento's product widgets.

In conclusion, the Webficial Product Image Roll module empowers your Magento 2 store with a dynamic and immersive product browsing experience. With the seamless display of gallery images on hover, customers can effortlessly preview products directly from list pages, search results, and product widgets. The module's compatibility with configurable product swatches further enhances the exploration of product variations.

Seamlessly install and experience compatibility with Magento 2, ensuring a quick setup process. Elevate your store's visual appeal, captivate your audience, and simplify the decision-making process for your customers. Webficial Product Image Roll is your key to transforming how customers interact with your products, fostering an enriched and enjoyable shopping experience.
