

Order Progress Bar Module

For Magento 2

User Guideline

Welcome to Visual Order Progress by Webficial Technologies! This user guide will equip you with the knowledge to leverage this powerful module and enhance your customer's order tracking experience within your Magento store.

What is Visual Order Progress?

Visual Order Progress transforms the way your customers track their orders. It replaces cryptic email updates with a visually appealing progress bar displayed directly on each customer order page. This intuitive interface allows customers to see the current stage of their order, completed stages, and upcoming steps at a glance.

Benefits for Your Customers:

Clear Order Tracking: Gain instant insight into the current location of their order within your fulfillment process.

Real-Time Updates: See completed stages highlighted for a stress-free tracking experience.

Simplified Navigation: Eliminate the need to navigate through invoices or shipments for status updates.

Getting Started:

There's no complex setup involved! The module is typically activated by your store administrator. Once activated, you'll see the Visual Order Progress bar displayed on each of your orders within your Magento account.

General Configuration

Enable
[store view] Yes

Manage Status
[store view]

Order status	Sort Order	Image	Action
Pending <input type="text"/>	1 <input type="text"/>	 <input type="text" value="File"/>	
Processing <input type="text"/>	2 <input type="text"/>	 <input type="text" value="File"/>	
Shipped <input type="text"/>	3 <input type="text"/>	 <input type="text" value="File"/>	
Delivered <input type="text"/>	4 <input type="text"/>	 <input type="text" value="File"/>	
Complete <input type="text"/>	5 <input type="text"/>	 <input type="text" value="File"/>	
<input type="button" value="Add More"/>			

Configuration:

Enable/Disable Module: Activate the module with a single click to start providing visual order tracking to your customers.

Manage Statuses:

- Adding Order Stages: Click the "Add More" button to create new custom stages that reflect your specific fulfillment process. Examples include "Order Received," "Payment Confirmed," "Picking & Packing," "Shipped," and "Delivered."
- Sorting Order: Define the order of appearance for each stage within the progress bar. This ensures the bar aligns with the logical flow of your fulfillment process.
- Uploading Stage Images: Enhance the user experience by uploading a unique image for each order stage. These images will be displayed on the progress bar, adding a visual element to each stage.

Understanding the Progress Bar:

The progress bar is segmented into distinct stages reflecting your store's fulfillment workflow. These stages might include:

- Order Received
- Payment Confirmed
- Picking & Packing
- Shipped
- Delivered

Completed stages will be automatically highlighted in a reassuring green color. The remaining stages represent the upcoming steps before your order arrives.

Customization:

In some cases, your store administrator might have uploaded custom images for each stage. These images will be displayed within the progress bar, adding a personalized touch to the tracking experience.

Additional Notes:

The specific order stages displayed and their order of appearance might vary depending on your store's configuration.

We encourage you to explore the full potential of Visual Order Progress and witness the positive impact it can have on your Magento store's customer experience and operational efficiency.

Thank You!!
